DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The limitation "a lateral extent portion" in claim 1 renders the claim indefinite. The limitation "a lateral extent portion" is not defined by the claim. As a result, it is unclear which element is referred to as a lateral extent portion in the claim. Furthermore, a lateral extent portion is not the same as an entire lateral extent of the at least one of the power supply line and ground line.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Christensen et al. (USPN 6,121,659).

Christensen et al. discloses the claimed semiconductor device (Fig. 8) comprising an SOI substrate having a structure in which a semiconductor substrate 12,

Art Unit: 2811

an insulating layer 14 and a semiconductor layer 16 are layered in this order, the semiconductor substrate being in contact with the insulating layer; an isolation insulating film 26 formed in a main surface of said semiconductor layer; a first semiconductor element (25) formed in an element formation region defined by said isolation insulating film in said semiconductor layer, said first semiconductor element including source/drain regions (30, 32) formed in contact with said insulating layer 14; a silicon dioxide 18 as an interlayer insulating film formed on and to contact said first semiconductor element and said isolation insulating film; a ground line 38 formed on said interlayer insulating film; and a first complete isolation insulating film 26 formed throughout a lateral extent portion directly below the ground line.

Allowable Subject Matter

Claims 23-25 are allowed.

Claims 4-6 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1 and 22 have been considered but are moot in view of the new ground(s) of rejection.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., an entire lateral extent of the at least one of said power supply line and ground line) are not recited in the rejected claim(s). Although the claims are interpreted in light

Art Unit: 2811

of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
